

NEW HOLLAND AT NAMPO 2010

New Holland Agriculture, distributors of leading brands of agricultural machinery, is exhibiting a range of new tractor models and specialist equipment at Nampo in May 2010.

New products on the stand will include New Holland T9000 tractors that achieve even higher performance standards in the most grueling conditions and the new TM7000 tractor series.

The new **TS6020** tractors from Brazil boast an 81 kW 4.5L, 4 cylinder New Holland Engine turbo charged with intercooler. This is the latest tractor in the New Holland range, currently undergoing field tests in South African conditions.

The new TDF Orchard Tractors series - just launched locally - meets the demand from farmers for a simple, robust and affordable tractor, with the latest technological features.

The multi-award winning T7000 range, which consists of four tractors - the T7030 (123 kW), T7040 (134 kW), T7050 (145 kW) and the T7060 (157 kW) - will also be on show. These tractors boast increased power, more transmission options, less fuel consumption and reduced noise levels.

Prestigious awards for this series include Golden Tractor for design 2010, Tractor of the year 2010, Technical Innovation Award 2008, Best Design 2008, Tractor of the year 2008

New Holland, which has played a dominant role in the big square bale market for many years, will also display the BB9070 baler.

Self-propelled forage harvesters – the FR9000 series – will also be exhibited. The new FR9050 forage harvester is currently being tested in local conditions by CNH.

New Holland has dedicated a section of the stand to precision land management (PLM). A dedicated expert in this field will be on hand to demonstrate and explain the benefits and intricacies of high tech farming. New Holland's PLM equipment fully integrates cutting edge precision farming components for every operation, enabling the farmer to maximise productivity for optimum crop yields.

Apart from this equipment, New Holland also supplies combine and forage harvesters, hay equipment, grape harvesters, planters, discs and Cane Thumpers. A comprehensive range of quality branded and competitively priced parts and accessories is available nationally.

New Holland also offers personal training courses and an ongoing technical support service for its broad range of products.
